

*Typical Absorption Trench Disposal Field Prior to Backfill*

*Chromaglass Wastewater Treatment System*

Dufresne Group's (DG) team of on-site wastewater disposal (WWDS) specialists have designed over 300 small scale (140 to 6,500 gallons per day) WWDS projects throughout Vermont. The DG team of Licensed Engineers and Designers hold licenses and certifications to install all type of approved WWDS within the State of Vermont for any size system.

DG has years of experience working with traditional in-ground, modified (at-grade and mount type systems), alternative and pretreated systems and keep current on technical education and training for these systems. DG staff works with the State of Vermont Wastewater Management Division on a regular basis and assists clients through the permitting process in a professional and efficient manner.

## WWDS PROVIDED BY DG:

- Soils Evaluations
- Topographic Survey
- Design
- Permitting
- Construction Services
