

LOCAL TRANSPORTATION FACILITY PROJECTS VERMONT

Dufresne Group (DG) has provided civil engineering services for several municipal transportation projects. Many of these projects were funded through the VTrans Local Transportation Facilities (LTF) Programs. Over the past several years, DG has developed a thorough understanding of the LTF project development process from planning through construction. DG has also developed good working relationships with many of the VTrans LTF Project Managers. DG staff is well-versed in the VTrans Standard Specifications for Construction and the development of Special Provisions.

LTF projects typically have three phases: Scoping Study/Planning, Final Design and Construction. DG has completed projects in all three phases throughout the State of Vermont. The following is a list of LTF projects that have been completed by DG or are currently in process.

Town	Project Name	Type	LTF Project Manager
Brattleboro	Downtown Sidewalk Project	Final Design	Nancy Avery
