

SPRINGFIELD HOSPITAL

SPRINGFIELD, VERMONT

Springfield Hospital is a certified critical access hospital servicing communities in southeastern Vermont and southwestern New Hampshire. Dufresne Group was hired to design a project that would alleviate existing maintenance requirements for access and snow removal for the existing hospital site. The project consisted of existing parking lot expansion and new access roads. The project created 60 new parking spaces.

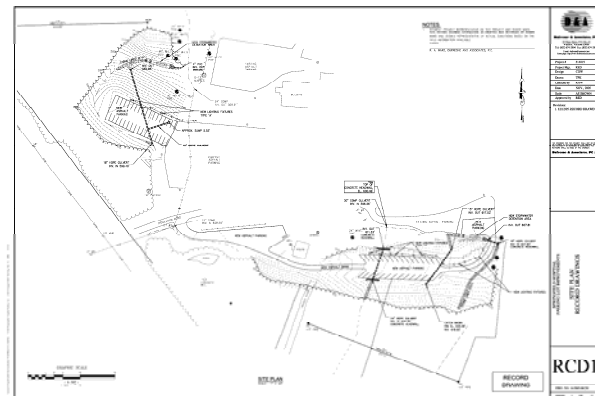

Springfield Hospital Main Entrance

Key Features

- Access Road Design
- Parking Lot Design
- Grading Design
- Stormwater Permitting
- Construction Services

Stormwater Features

- Dry Swale
- Grass Lined Channels
- Catch Basins
- Headwall Structures
- Culverts

Dry Swale

One of the major accomplishments of this project was creating a stormwater treatment system that was not only functional, but aesthetically pleasing and noninvasive.
