VERMONT ROUTE 131 SIDEWALK DESIGN

CAVENDISH, VERMONT

KEY FEATURES

- Completed design according to VTrans Standards under direction of a Municipal Project Manager.
- Incorporation of Local sidewalk project on High Street
- Coordination with existing storm drain facilities.
- Relocation of Bus Stop Platform.
- Accommodation of Existing Underground Power Utilities
- Installation of about 850 feet of granite curbing along the sidewalk.
- Use of Crosswalk Imprints
- Coordination with Route 131 alignment.

DG provided final design services for a VTrans project in the center of Cavendish Vermont for about 800 feet of concrete sidewalk and granite curb. The sidewalk was designed in accordance with VTrans Design Requirements including compliance with Americans with Disabilities Standards.
