

Dufresne Group completed project design and permitting for Phase I and II of the Windsor Streetscapes project. The complete Streetscapes project will create an attractive and safe pedestrian network through downtown Windsor.

Phase II of the Windsor Streetscapes project will improve pedestrian access in downtown Windsor and provide facilities for Amtrak passengers and other visitors to access the downtown area.

This phase of the Streetscapes project includes sidewalk improvements along Depot Avenue and River Street, including new granite curb, new sidewalk, improved parking layout and historic-style lighting installation.

The project required acquisition of many permanent and temporary easements to address right of way issues on three municipal streets abutting the project.

KEY FEATURES

- Funded by VTrans Local Transportation Facilities Program.
- Improve aging and potentially unsafe sidewalk in the downtown area.
- Enhance appearance of downtown area.
- Reuse of existing granite curbing
- Provide transition from Welcome Center and Amtrak Station to downtown center.
